

# Tool Discovery

- ▶ **User story:** *As a scholar, I am looking for tools and want to browse through and search in a registry of available tools in order to select the tools I need to further my research.*
- ▶ **Implementations:** Ineo, CLARIN switchboard, LaMachine portal, CLAPOPOP
- ▶ **Proposed discussion points:**
  - ▶ Vocabularies for software/service metadata (codemeta/cmdi)
  - ▶ Automatic harvesting of software/service metadata
  - ▶ Registry and backend API for collected software/service metadata
  - ▶ Possible collaboration with the CLARIN switchboard
  - ▶ Ineo only as a thin frontend layer
